

CASCOS C5 WAGON

TWO POST LIFT WITH BASE

The Cascos C5 Wagon is a solid-based, 2 Post lift with a 5,000kg capacity, designed specifically for Light Commercial Vehicles, Ambulances, Armoured Vehicles and the like.

Symmetrical 3-stage arms allow complete flexibility, with the option to mount a vehicle in either direction, and the unique 'SlenderTec' hot-rolled, solid steel post profiles allow the lift to be constructed with narrow posts, which minimise the lift footprint, with no operational loss.

KEY FEATURES

- Lift exclusively designed for van specialists – can accommodate most vehicles up to 5,000 kg.
- 4x 3-stage symmetric arms for a safe working environment.
- Solid, reliable and durable.
- Maximum working space between posts.
- Reversible: It is possible to lift the vehicle in both directions.
- Minimum maintenance.

TECHNICAL SPECIFICATIONS

- Load Capacity: 5,000kg
- Arms: 4x 3-stage symmetrical
- Min/Max arm length: 855mm/1,810mm
- Min/Max height: 150mm/1,945mm
- Width between posts: 2,810mm
- Lifting time: 40 seconds
- Electrical requirement: 400V 3Ph (Standard), 230V 1PH (Option)
- Motor Power: 3kW
- Net weight: 1,300kg
