

MEGASPIN 420

SUPER AUTOMATIC 3D DATA INPUT WHEEL BALANCER

The megaspin 420 is in our opinion, the best value wheel balancer on the market today. The combination of revolutionary technology, incredible simplicity, and typical Hofmann Megaplan reliability make this a superb choice for any workshop serious about tyres. Features such as 'No Check Spin', 'One Weight Balance' and a 'Split Weight' function, which enables behind the spokes positioning of weights, set this machine apart from the competition.

NOW WITH ONE WEIGHT BALANCE

By having a laser 'pinpoint', our revolutionary new software enables the operator to accurately balance a wheel using just one weight! Traditionally, 'static' balancing could only determine the approximate position on the rim, but now we can use laser accuracy to identify the exact lateral position across the rim to place the weight in order to eliminate dynamic as well as static imbalance!
